DETAILED ACTION

Election/Restrictions

1. This application contains the following invention:

Group 1, claim(s) 1-22, drawn to methods for detecting the presence of alterations in the PPY, PYY and/or GIP genes.

2. In the instant case Group 1 is subject to a restriction requirement because the claims of Group 1 encompass distinct genes. Specifically the claims encompass 3 distinct genes (PPY, PYY, and GIP) as well as all possible combinations thereof. In the instant case the description fails to disclose that each of the genes share a common property or activity. Moreover, since each gene occurs at a specific nucleotide position and consists of a specific nucleotide sequence they fail to share a common structure. Since neither of these two requirements is met, the group of genes claimed does not meet the requirement of unity of invention. Therefore Applicants must elect **a single gene** or **a single combination of genes** to be examined.

Additionally claims 7-16 and 22 encompass distinct SNPs. Specifically the claims encompass seven distinct SNPs (SNP4-SNP11) as well as all possible combinations thereof. In the instant case the description fails to disclose that each of the SNPs share a common property or activity. Moreover, since each SNP occurs at a specific nucleotide position and consists of a specific nucleotide sequence they fail to share a common structure. Since neither of these two requirements is met, the group of

SNPs claimed does not meet the requirement of unity of invention. Therefore Applicants must further elect **a single SNP** or **a single combination of SNPs** within the elected gene(s) to be examined.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one

claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to AMANDA SHAW whose telephone number is (571)272-8668. The examiner can normally be reached on Mon-Thurs 8:00 TO 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached at 571-272-0735. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
